PayPoint and Share Energy partner to improve customer payment services

Welwyn Garden City, November 2024: PayPoint and Northern Ireland electricity supplier, Share Energy, are pleased to announce a new partnership that will provide pre-payment customers with convenient payment solutions available immediately at PayPoint locations.

The partnership means all pre-payment Share Energy customers can now top-up their electricity meters in any one of PayPoint's 1,167 stores in Northern Ireland.

Share Energy brings an innovative, customer-first approach to the energy market, with its attractive profit-share revenue model poised to drive rapid, large-scale customer growth. The partnership with PayPoint ensures that robust payment services and infrastructure are in place to support this anticipated demand.

The partnership further demonstrates Share Energy's commitment to enhancing customer experience, complemented by PayPoint's dedication to leveraging technology to improve payment services and the end-user experience.

Ian Ranger, Head of Business Development, PayPoint said: "We're proud to be supporting Share Energy through the provision of an accessible and convenient payment service for its customers. As we enter the colder months topping up energy meters will become an essential task for many. Through our network of retailers in Northern Ireland we're pleased to provide a close and easy payment solution with this partnership. Our network allows customers to combine daily errands at a store close to home and experience a quick and streamlined payment service."

Damian Wilson, CEO at Share Energy added: "We are excited to partner with PayPoint, as this collaboration strengthens our commitment to delivering a seamless, customer-focused experience.

"With PayPoint's advanced payment solutions, we are well positioned to support our rapid growth and provide our customers with reliable, convenient options that enhance their experience with us."
