PayPoint powers RingGo Retail parking payments

New partnership allows drivers to pay in-store for parking

Welwyn Garden City, 7th July 2020: [PayPoint](#) and [RingGo](#) have today announced the launch of RingGo Retail, a new offering that enables drivers to pay for parking at over 27,000 retailers across the UK.

The innovative solution allows motorists in more than 400 towns and cities to pay for their parking via PayPoint's extensive retailer network. The retailer simply enters the details of the customer's parking session and it can be paid for touch-free.

Designed to aid social inclusion, RingGo Retail means that drivers who were previously unable to pay for parking on a smartphone are now catered for. With 99.3% of the UK population living within a mile of one of PayPoint's stores, paying for parking has never been easier or more accessible.

Motorists can find their nearest PayPoint convenience store on the [RingGo](#) or [PayPoint](#) websites.

Danny Vant, Client Services Director at PayPoint, said: "Accepting RingGo payments across our network of 27,000 retailers is another example of how we are transforming convenience for both retailers and consumers. We're proud of this new partnership as it offers greater accessibility to drivers everywhere."

Peter O'Driscoll, RingGo's Managing Director says: "With the addition of RingGo Retail, at no additional cost to providers, we've created an inclusive solution that allows people without smartphones access to paid parking. Now drivers across all demographics can choose how they pay; on the move with RingGo app, or via cash or contactless at one of 27,000 outlets across the UK, whatever way they prefer."

Editors Notes

Despite the fact that over 80% of retail payments are now made by card and 95% of adults aged 16-64 have a smartphone, there has historically been some reluctance from Councillors and retailers about moving to completely mobile payments due to concerns about social inclusion. The scale and UK coverage of this new offering from RingGo means these concerns can be dissipated, allowing Councils and Private Operators to remove dependence upon physical machines, thereby helping safeguard both parking employees and members of the public.

About PayPoint

In thousands of retail locations, at home and on the move, we make life more convenient for everyone.

For retailers, we offer innovative and time-saving technology that empowers convenience retailers in the UK and Romania to achieve higher footfall and increased spend so they can grow their businesses profitably. Our innovative retail services platform, PayPoint One, is now live in over 16,000 stores in the UK and offers everything a modern convenience store needs, from parcels and contactless card payments to EPoS and bill payment services. Our technology helps retailers to serve customers quickly, improve business efficiency and stay connected to their stores from anywhere.

We help millions of people to control their household finances, make essential payments and access in-store services, like parcel collections and drop-offs. Our UK network of 27,000 stores is bigger than all banks, supermarkets and Post Offices together, putting us at the heart of communities nationwide.

For clients of all sizes we provide cutting-edge payments technologies without the need for capital investment. Our seamlessly integrated multichannel payments solution, MultiPay, is a one-stop shop for customer payments. PayPoint helps over 500 consumer service providers to save time and money while making it easier for their customers to pay – via any channel and on any device.

About RingGo

[RingGo](https://ringgo.co.uk/), is the UK's leading cashless parking provider. Part of the BMW/Mercedes NOW group, it creates software solutions for drivers, cities and operators that make finding, accessing and paying for parking quick, simple and effortless.
